## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 9-20 allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art failed to establish a detector that attenuates the optical signal based on an optical power of the optical signal or the method for variably attenuating an optical signal where the detector comprising, a detecting layer that receives an incident optical signal and generates a current that is related to an optical power of the incident optical signal, a PIN structure connected to that detecting layer such that the incident optical signal passes through the PIN structure before the detecting layer and a control module that monitors the optical power of the incident signal detected by the detecting layer, wherein the control module generates a bias voltage to reverse bias the PIN structure when the optical power exceeds a threshold voltage such that the incident optical signal is attenuated by the PIN structure before being detected by the detecting layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
